

## RPFAB Book Nook Diorama Kit Assembly Guide – Simple Single Wide (SSW)

Thank you for your purchase.  
Now it's time to get your  
creative ideas flowing and put  
together your Book Nook  
Diorama!

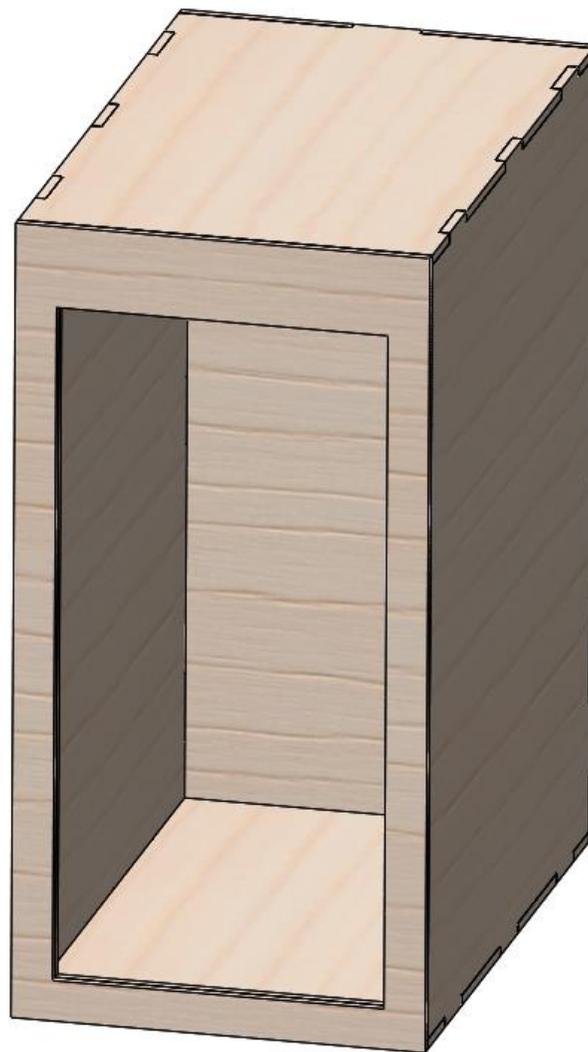

### If you have experience with building Book Nooks:

There are different ways to assemble and use this kit so feel free to deviate from this guide if your design requires it! Before decorating and gluing things up, I recommend a quick pre-assembly to mark the panels with a sketch and notes to remember which side is up, and forward.

### If you've never assembled a Book Nook before, here are some general tips:

I like to start by decorating the individual interior panels and base. Then assemble the panels using a flexible hot glue. This will help allow each tab and slot to line up and create a well shaped final box. Plus, if you want to make a change, you can easily do so at any time.

When you're happy that the book nook doesn't need to be disassembled again, add a stronger wood or epoxy glue to the joints to further secure the panels. This method ensures the box will stay 'square' and be very strong.

With that overview in mind, let's go to the instructions!

Tip: If you plan to use acrylic or water based paints, the wood grain will rise. Sand the parts with 220 grit paper (on an orbital sander, if possible). Then use a light coat of white or gray acrylic paint, then sand to remove the raised grain. Then final paint for a smooth finish.
